good but not excellent

By Sarah Adam

FOR THE WRITER, good but not excellent ..did not like the Nephrology at all, need review the CNS stroke has serious fatal mistakes in mangament. Where is the preventive medicine. ? ADD CHAPTER FOR THAT. Toxicology need additions. dermatology need additions too. where is ENT? shock is not well written. pulmonology is also need revision may be you need to take another help from another good teacher or somone who have a lot to add. you book is good but not excellent ...i liked the organization and short notes that make you remember quickly and finish the book from a to z in short time.

2 of 2 people found the following review helpful.

excellent book that has usmle world concepts in it.

By ricky

This is a great book which when used with usmle world, improves your score by 30 to 40 points. it covers lots of concepts from usmle world and kaplan q bank . a must have in conjunction with the q banks. i highly recommend it. its compact and easy to read and so memorization is easy. great job Dr. Dhesi!!

1 of 1 people found the following review helpful.

has the potential of a great book, but still far from it

By Anonymous

Spelling mistakes continue, even tho it's the second edition. Still disappointed and some of the information is incorrect, therefore, must correlate with another text.

The good thing is the organization and flow of the material is great. He covers a good deal of topics

I think it's best to avoid this book, it's better to use another book and go through the qbanks (Kaplan and Uworld) and add any important information yourself.
