BEHIND THE LENS: DISPATCHES FROM THE CINEMATOGRAPHIC TRENCHES BY JAY HOLBEN PDF

Filmmaker Jay Holben has been battling in the production trenches for most of his life. For the past 17 years, he's chronicled his adventures in the pages of American Cinematographer, Digital Video, Videography, and TV Technology. Now, in Behind the Lens: Dispatches from the Cinematic Trenches, he's compiled nearly 100 of his best articles on everything from camera technology and lenses to tips and techniques for better lighting. Whether you're making independent films, commercials, music videos, documentaries, television shows, event videos, or industrials, this full color collection provides the tools you need to take your work to the next level and succeed in the world of digital motion imaging.

Featured topics include:

*Tech, including the fundamentals of how digital images are formed and how they evolved to match the look of a film, as well as image compression and control

*Optics, providing a thorough examination of lenses and lens interchangeability, depth of field, filters, flare, quality, MTF, and more

*Cameras, instructing you in using exposure tools, ISO, white balance, infrared, and stabilizers

*Lighting, featuring advice on using lighting sources and fixtures and how to tackle common lighting problems

Additional tips and tricks cover improving audio, celestial photography, deciding if film school is right for you, and much more.

For over a decade Jay Holben has worked as a director of photography in Los Angeles on features, commercials, television shows, and music videos. He is a former technical editor and frequent contributing writer for American Cinematographer, the current technical editor and columnist for Digital Video, and the lighting columnist for TV Technology. The author of A Shot in the Dark: A Creative DIY Guide to Digital Video Lighting on (Almost) No Budget, Holben is also on faculty for the Global Cinematography Institute. He is now an independent producer and director.

Must Read for any Film Student

By Amazon Customer

Jay's book is a must read for any student of cinematography looking to deepen their understanding of the craft. Jay has the ability to take complex concepts and to break them into easily digestible examples and references written in a very easy to understand style. I use both of Jay's books as reference texts in courses I teach in cinematography for that very reason. The chapters he has written on Optics are an amazing resource on a topic seldom explored in cinematography text in great detail. I also love that the book touch on practical exercises like tying knots that every filmmaker can use. The book is littered with great illustrations, charts, and photos that really add value to the content. I highly recommend *Behind the Lens!*

AMAZING RESOURCE!

By Amazon Customer

Jay is the best teacher in these subjects I have had the pleasure to read and talk to!

His extensive experience and research is absolutely incredible and the fact that he writes these books to share his knowledge in such a simplified way that can get through practically anyone is even more admirable. After reading his first book, he now unconditionally has me recommending his literature (including articles on several very recognized film magazines) to all cinematography students I have taught and worked with.

I cant recommend this piece enough, I actually now carry it in my bag every time I go on set as a great resource for creative approaches as much as a technical guide.

You wont regret buying this one and reading it over and over! Great investment!

The best resource for anyone wanting to be a Cinematographer

By David Pitt

The best resource for anyone wanting to be a Cinematographer. Jay not only talks about the process he explains the why and how. If you want to learn more about being a DP and become a better and more technical film maker this is the best book on the market.
