This book is a step-by-step procedure to build a 6-foot-tall fully functional automatic grow cabinet complete with lighting, fans, and timer. It can be built in one day by one person, using common tools you probably already have in your tool box, along with simple things like screws and wire-nuts that you can definitely find in your local hardware stores. This is a simple and easy to follow version of many other similar plans and ideas you may find all over the internet on websites and message boards, but this guide tells you EXACTLY what materials to get to SAVE THE MOST MONEY and have a Long-Lasting, Productive, Top-Quality Grow Cabinet. These plans can be used to build a cabinet for vegetative growing, flowering, and drying. I have built several grow cabinets using these exact plans in about 10 hours, over the course of a weekend. This design is very similar to commercial grow cabinets you can see advertised between \$1800 and \$3000. But now you can build one for under \$478!!

exactly what it says it is, very detailed, very functional

By Brian Omik

this ebook is exactly what it says it is. if you and your mates are a bit handy, you shouldn't have any trouble at all using these instructions to make your growing dreams a reality. even says where to get everything and how much it all should cost. cheers

awful!

By Pipe Torcuato

Lack of photos

Lack of explanation

Does not show images of final work

A waste of money! I want my money back!
