Heaven-sent!

By lauren

This book has been heaven-sent for my sister and her husband after they had their first baby. My sister would read the book while doing night feedings to her newborn son and was amazed at the wealth of knowledge the

book provided both her and her husband. It was the best gift she received (other than her healthy and happy son, of course). Wonderful read and so helpful!

Great resource!

By Noah S

It's rare that a book combines scientific authority with such clear and compassionate writing. Unlike so much 'wisdom' about babies and parenting that seems to be based on little more than individual anecdotes, the information here is grounded in solid evidence but at the same time does not lose the personal touch: it is clear that Murray, even after so much academic study, has not lost her love of children and still has an intimate understanding of what is so human and special about the parent (and grandparent!)-child relationship. And to top it all off, the book is filled with wonderful pictures and the layout makes it a pleasure to read. I've already bought copies for all my friends who are pregnant or have small children.
