In a lifetime of exploration, writing, and passionate political activism, John Muir became America's most eloquent spokesman for the mystery and majesty of the wilderness. A crucial figure in the creation of our national parks system and a far-seeing prophet of environmental awareness who founded the Sierra Club in 1892, he was also a master of natural description who evoked with unique power and intimacy the untrammelled landscapes of the American West. The Library of America's Nature Writings collects his most significant and best-loved works in a single volume, including: *The Story of My Boyhood and Youth* (1913), *My First Summer in the Sierra* (1911), *The Mountains of California* (1894) and *Stickeen* (1909). Rounding out the volume is a rich selection of essays—including "Yosemite Glaciers," "God's First Temples," "Snow-Storm on Mount Shasta," "The American Forests," and the late appeal "Save the Redwoods"—highlighting various aspects of his career: his exploration of the Grand Canyon and of what became Yosemite and Yellowstone national parks, his successful crusades to preserve the wilderness, his early walking tour to Florida, and the Alaska journey of 1879.

I suggest you read Muir's book

By Fredonyer it is!

The writings in this book provide a foundation of appreciation for all encompassing "nature". This book can be judged by title... John Muir is genius, and a poet! His depth of knowledge (engineering, botany) is evident throughout, and his passion to study everything natural is unsurpassed. He was beyond today's definition of "motivated." His book inspired me to backpack the JMT. Between this book, and hiking "his" trail, I owe my broader spiritual sense to him.

Muir should be required reading, period.

By Shikantaza

I've only read "My First Summer in the Sierra," and attest to Muir's enchanting style and lucidity. He writes as an enthusiast, but gives his stories a plain-spoken clarity that can be enjoyed by all.

Muir must have been quite an individual - after working as a shepherd for a few months, he talks of getting time off from his employer, "tying some bread to his belt, and walking to Mammoth" from the Merced area of the western foothills of the Sierras. Yep, a nice casual stroll. Or climbing and looking down into the ice cone on Yosemite Falls. Why not? It's there every winter...

I hope Library of America will put out another volume so they can make "The Yosemite" available to all. In it, Muir describes the three native Californian "Yosemite" (Tuolumne, Sequoia, and Kings) almost as a tour guide. This book is a glaring omission from the LoA volume, and gives great insight into the mind of the premier conservationist of the early 1900s.

As always, LoA delivers a quality volume at a good price.
