Review

"Alexander Betts is one of a handful of scholars who have mastered the complex field of Global Migration Governance. This large and impressive volume covers the topic from every conceivable angle, and it gets the difficult mix of empirical analysis and policy recommendation right. As the global conversation about migration governance continues over the coming years, this work will remain the standard reference."-- Randall Hansen, Research Chair in Political Science, University of Toronto

"An invaluable contribution to migration research and studies of global governance more broadly. Drawing on useful concepts derived from International Relations, the excellent contributions draw a picture of a multilayered, fragmented and yet quite encompassing set of formal and informal governance arrangements that mirror the diversity of challenges associated with global population flows."--Sandra Lavenex, Professor of International Politics, University of Lucerne

"Betts's careful editorial work and insightful analysis allow for a truly comprehensive discussion of global migration governance ... This volume is essential reading for scholars and students of migration as well as practitioners. It is a necessary reference point for future studies and policy debates about a realistic global governance framework that effectively and humanely protects and promotes the rights of all migrants."-- International Migration Review

GLOBAL MIGRATION GOVERNANCE BY ALEXANDER BETTS PDF

Unlike many other trans-boundary policy areas, international migration lacks coherent global governance. There is no UN migration organization and states have signed relatively few multilateral treaties on migration. Instead sovereign states generally decide their own immigration policies. However, given the growing politicization of migration and the recognition that states cannot always address migration in isolation from one another, a debate has emerged about what type of international institutions and cooperation are required to meet the challenges of international migration. Until now, though, that emerging debate on global migration governance has lacked a clear analytical understanding of what global migration governance actually is, the politics underlying it, and the basis on which we can make claims about what 'better' migration governance might look like.

In order to address this gap, the book brings together a group of the world's leading experts on migration to consider the global governance of different aspects of migration. The chapters offer an accessible introduction to the global governance of low-skilled labour migration, high-skilled labour migration, irregular migration, lifestyle migration, international travel, refugees, internally displaced persons, human trafficking and smuggling, diaspora, remittances, and root causes. Each of the chapters explores the three same broad questions: What, institutionally, is the global governance of migration in that area? Why, politically, does that type of governance exist? How, normatively, can we ground claims about the type of global governance that should exist in that area? Collectively, the chapters enhance our understanding of the international politics of migration and set out a vision for international cooperation on migration.
